

LED it be!

The **NEW** Constant Current High Power **LED-Driver!**

Features:

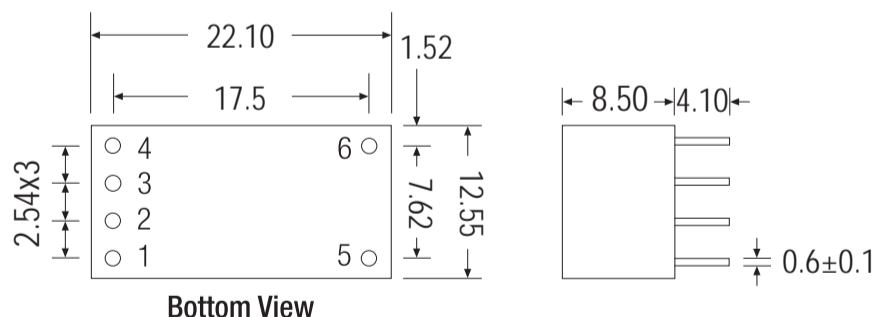

- Drives up to ten 2W power LEDs
- 300mA to 700mA constant current
- Wide input voltage (5V to 36V)
- PWM digital dimming and remote On/Off control pin
- 0~4VDC analog dimming and remote
- Efficiencies up to 97%
- Short circuit protected
- -40°C~+85°C operating temperature
- Lead free/RoHS compliant

Applications:

- High power LED-Driver
- Constant current source
- High reliability lighting
- General illumination
- Industrial lighting

The RCD-series is a constant current step down LED-Driver to drive high power LED's. Offering a wide input/output voltage range, an ultra miniature package, high efficiency (up to 97%) and two dimming control options (PWM and Analog) to meet a wide variety of customer requirements.

Package A: RCD-24-XXX – Style and pinning (mm)

DC-DC-Converters - AC-DC-Converters - Switching Regulators - LED Drivers
